📍 Manchester (Open to Relocation)

Aspiring web engineer with a passion for building complex scalable web apps. Seeking to obtain a postion that brings new challenges and skill development in order to further my expertise and reward in the work field.

WORK EXPERIENCES

Ethernet Advisor
Gamma Telecomunications | 2018 - 2021

This was a non developer related role. However i did create a Chrome extension using Javascript to automate daily data entry tasks. By doing so this reduced Human error which saved the business potential costs of up to £1000s.

Aside from this, The general day-to-day Tasks were as follows:

- Understand high level requirements, limitations and indicative timescales Orders
- Conduct 'root cause' analysis on resolution of any provisioning incidents.
- Handle and resolve end to end customer queries, aiming for first time fix.

Food Delivery Rider
Uber | 2020 - Present

Started this job in the midst of the Covid 19 Pandemic to support key workers and those in social isolation.

Technical Support Officer
Joshua Brookes LTD | 2012- 2016

- Provide technical support for all departments.
- Manage and maintain the business phone software.
- Configure and Diagnose Server Hardware and Software

PROJECTS

PoeticFlowerX.com
Custom Wordpress Theme & Plugin

A side project developed for a friend who needed a website for a blog and Ecommerce to sell Prints. I created a custom wordpress theme and a custom contact form Plugin.
See full case study on my portfolio website

Amadeus - Employee Dashboard Mockup
Open Source

A mockup for an employee dashboard created with HTML CSS and Vanilla JS.
I also used Chart JS for Data Visualization.
